STATE OF IDAHO, DEPARTMENT OF AGRICULTURE DIVISION OF ANIMAL INDUSTRIES

In The Matter Of:

ADMINISTRATIVE ORDER 04-02

) ORDER MODIFYING IMPORTATION
) REQUIREMENTS OF ANIMALS
)
)

Bovine Tuberculosis is a contagious bacterial disease affecting cattle, caused by *Mycobacterium bovis*. Bovine Tuberculosis may be transmitted to people through contact with infected animals. Bovine Tuberculosis has been diagnosed in dairy cattle in the states of Arizona, California, and New Mexico.

Therefore, by authority of Title 25, Chapter 2, Idaho Code and IDAPA 02.04.21.111., this Order is issued the 21st day of December, 2004, and is effective the 15th day of January, 2005, in order to prevent the introduction and dissemination of Bovine Tuberculosis among the cattle of Idaho. The following additional import restrictions are placed on all sexually intact dairy breed cattle.

1. All sexually intact male and female cattle, six (6) months of age and older, of dairy breeds, which are bred, raised, or utilized for the production of milk and milk products, shall be officially identified and tested for tuberculosis, with negative results, within sixty (60) days prior to entry into the state of Idaho.
2. Cattle and bison, including dairy cattle, that originate in an accredited tuberculosis free herd in either an accredited free state or zone, a modified accredited advanced state or zone, or a modified accredited state or zone, as defined by USDA in Title 9, Part 77, CFR, and for which both an accredited herd number and date of last tuberculosis test are shown on the certificate of veterinary inspection, may enter the state without a tuberculosis test

The only exceptions to this Order shall be by written approval of the Administrator of the Division of Animal Industries upon epidemiological evaluation and risk determination.

DATED this 21 day of December, 2004, at Boise, Idaho.

Clarence Siroky, D.V.M.
Administrator
Division of Animal Industries
